6	Year 3	Number	3	
7	Year 4	Number	3	
8	Year 5	Number	3	
9	Total NXX(s)	Number	4	

File and Data details

Record IDs should be unique sequential numbers for each record within the file excluding the beginning record/header.

Each field should be separated by a comma (,) and fields containing multiple word strings and/or commas (,) should be enclosed in double quotes ("). The separator comma (,) is required for all the fields, even fields that do not contain values or that are not provided.

Each file should have:

1. one beginning record/header that gives the count of total records in the file excluding the beginning record/header;
2. then one record containing *Contact Information*;
3. then one or more records containing the *Forecast Information*.

The following file naming convention should be used:

1. Service Provider OCN
2. Date of Transmission (Format: MMDDYYYY)
3. Form Name ('F3AS')
4. File Extension ('DAT')

Each of the above values should be separated by a period ('.'). Characters should be in upper case only.

Example: 556Z.10242016.F3AS.DAT corresponds to a Service Provider '556Z' transmitting form F3AS on October 24, 2016.
