RE: Toll-free Number Exhaust Forecasting/833 NPA Announcement

Dear Ms. Sprague:

The Alliance for Telecommunications Industry Solutions' (ATIS) SMS/800 Number Administration Committee (SNAC) thanks you for your email of June 25, 2014, regarding the forecasted exhaust of the toll free code 844.

An August 2014 analysis of the Toll-Free resource conducted by SMS/800, Inc. (attached) projected the resource would reach a 90% in-use threshold in 3Q2016 and 95% in-use threshold in 3Q2017, with full exhaust in 3Q2018. As of July 5, 2014, TFNs in use had reached 38.46 million, just over 80% of the TFN pool of 47,770,094.

Based upon this information, the SMS/800 Number Administration Committee (SNAC) recommends the Federal Communications Commission (FCC) consider opening the 833 NPA on or about June 30, 2017.

Please contact us if you have any questions regarding this information.

Best regards,

David Greenhaus
