

Number: PL- 575
Date: 02 December 2021
From: Canadian Numbering Administrator (CNA)
Subject: NPA 468 to Overlay NPA 819/873 (western Quebec)
Related Previous Planning Letters: N/A

In Telecom Decision CRTC 2021-393, dated 1 December 2021, the Commission approved the 819/873 Relief Planning Committee's report which recommended relief for area codes 819/873 serving western Québec be provided through a distributed overlay of new area code 468 starting 22 October 2022.

New area code 468 has been assigned by the North American Numbering Plan Administrator (NANPA) and will be implemented as a distributed overlay over the geographic area of western Quebec currently served by the 819 and 873 area codes. The area served by NPA Codes 819/873 and the new 468 NPA Code consists of 211 Exchange Areas, including the Exchange Areas of Hull, Drummondville, Gatineau, Shawinigan, Sherbrooke, Trois-Rivières, Val d'Or and Victoriaville. A map showing the location of the area served by NPAs 819 and 873, and a list of the 211 Exchange Areas are attached to this letter.

When the new 468 NPA is introduced, the dialling plan for the 468/819/873 overlay area will be as follows:

- All local calls, including Extended Area Service calls, originating within the 468/819/873 overlay area must be dialled with 10-digits; i.e., NPA-NXX-XXXX.
- Toll and alternately billed service calls originating within the 468/819/873 overlay area will continue to be dialled with 10-digits after the appropriate prefix digit(s).

All international and domestic Telecommunications Service Providers (TSPs) should activate the new 468 NPA throughout their networks by the start date for network testing (22 June 2022).

The following test numbers for the new NPA 468 will be made available effective 22 June 2022. Routing of calls to NPA 468 can be verified by dialling the 8378 (TEST) numbers which do not provide answer supervision. Billing of calls to NPA 468 can be verified by dialling the 2455 (BILL) numbers which provide answer supervision.

Test Number	Exchange Area (Rate Center)	Carrier
468-610-8378 and -2455	Ottawa-Hull	Bell Canada
468-210-8378 and -2455	Ottawa-Hull	Videotron

Calls successfully completed to test numbers will receive the following announcement:

La communication a été établie avec succès au numéro de vérification de l'indicatif régional 468, à [NOM DU TÉLÉCOMMUNICATEUR], Québec, Canada.

You have successfully completed a call to the 468 Area Code Test Number at [CARRIER NAME] in Québec, Canada.

The disconnection dates for the test numbers will be between 21 November 2022 and 13 January 2023.

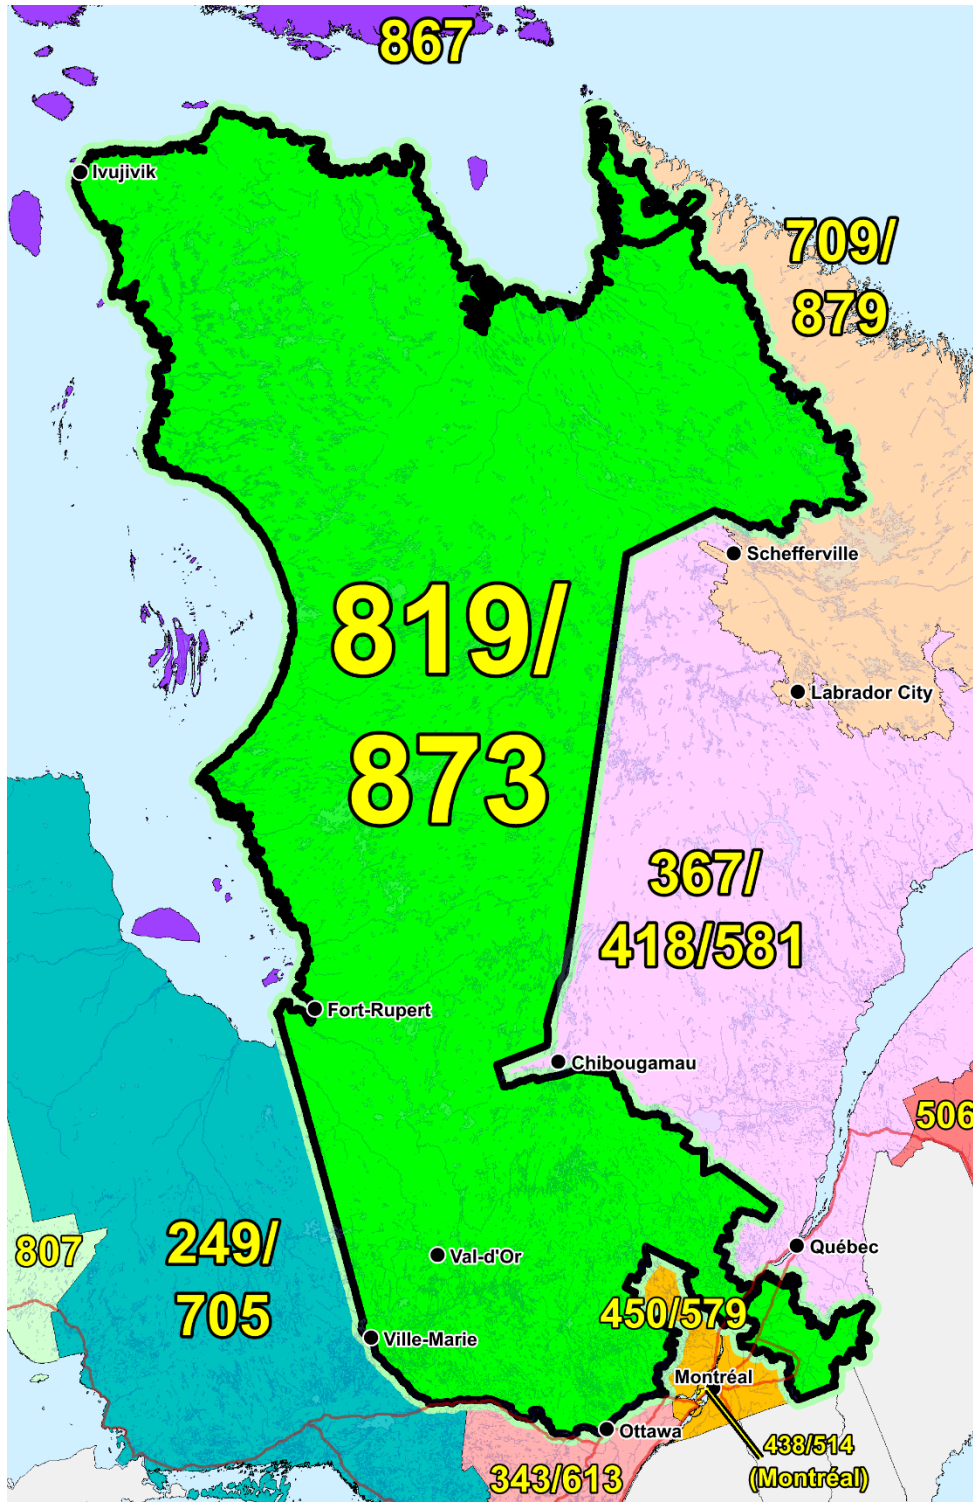

Central Office (NXX) Codes within NPA 468 may be assigned to TSPs starting from 22 April 2022 but cannot be activated in the PSTN prior to the Relief Date of 22 October 2022.

General questions about this relief activity may be directed to Suresh Khare or Kelly T. Walsh, of the Canadian Numbering Administrator (CNA), at 613-702-0016. Specific questions related to telecommunications services and network routing should be directed to the appropriate TSP.
